Featured Projects

Araaz E-commerce Website

Developed a fully responsive e-commerce website with automated contact handling using Web3Forms and deployment on Vercel.

Tech: HTML, CSS, JavaScript, Web3Forms, Vercel

Academic Portal System – Central University of Kashmir

Designed and developed a full-stack academic portal for students and faculty, featuring role-based authentication and personalized dashboards. Implemented core academic functionalities including attendance tracking, marks management, notices, and exam-related workflows with structured data handling and intuitive UI/UX.

Tech: React, TypeScript, Supabase, PostgreSQL, Vercel

2AI Conference Website – 2026 International Conference on Applied Artificial Intelligence

Collaborated on the design and development of the official conference website, focusing on crafting a clean, modern UI/UX and implementing a responsive, user-friendly frontend. Contributed to structuring content for accessibility and seamless navigation, ensuring an engaging experience for global attendees and researchers.

Tech: JavaScript, TypeScript, CSS, HTML

CUK Examination Management System (Team Project)

Collaboratively developed a secure and scalable examination management system with role-based access control and real-time data handling. Contributed to authentication workflows, structured database design, and responsive UI to streamline exam scheduling, data management, and user interactions.

Tech: React, TypeScript, Supabase, PostgreSQL, Vercel

CUK Acadex (Team Project)

Contributed to the development of a university-wide academic portal for Central University of Kashmir by building student and teacher portals with role-based dashboards. Implemented features enabling access to attendance, marks, notices, and exam-related information, focusing on structured data flow, usability, and responsive UI design.

Tech: React, TypeScript, Supabase, PostgreSQL, Vercel

BIS AI – Product Safety Assistant (Team Project)

Built an AI-powered product verification platform inspired by BIS standards, enabling users to check product authenticity and compliance with Indian regulations. Integrated an intelligent chatbot with multilingual support to provide real-time guidance and improve accessibility. Designed scalable backend workflows and responsive PWA interface.

Tech: React, TypeScript, Supabase, PostgreSQL, PWA, Vercel

Rasta AI – Smart Assistance Platform (Team Project)

Developed an AI platform structured across four domains—document understanding, crop intelligence, youth services, and AI-guided support—enabling users to access simplified information, agricultural insights, career assistance, and decision support. Integrated voice/text interaction, multilingual support, and real-time updates with a focus on accessibility and practical usability.

Tech: React, TypeScript, Supabase, PostgreSQL, Vercel

Smart House using Arduino

Designed an IoT-based home automation prototype integrating multiple sensors for intelligent environmental control.

Tech: Arduino, C++, Infrared, Ultrasonic Sensors

Competitive Achievements & Involvement

1st Position – Logo Designing Competition

Cyber Conclave 2025, Central University of Kashmir

Recognized for creativity, visual communication, and design thinking.

1st Position – Open Build Challenge

FOSS NIT Srinagar in collaboration with FOSS United

Demonstrated strong problem-solving skills and collaborative development in a competitive build environment.

1st Position – SynerTech 2026

Kashmir College of Engineering and Technology

Collaboratively developed a CRM-based Academic Management Portal with an AI-powered chatbot and Android application to streamline academic and administrative workflows through intelligent, real-time assistance.

2nd Position – Cursor Kashmir Hackathon (Vercel v0 Track)

Built *Rasta AI*, an AI platform for document simplification, crop insights, youth services, and AI-guided assistance, with voice/text interaction and multilingual support.

4th Rank – Portfolio BuildSprint 1.0

Girls Leading Tech

Demonstrated excellence in portfolio development under the EmpowerHer 2.0 initiative, highlighting technical proficiency, creativity, and continuous professional growth.

Standard-a-Thon Hackathon – FOSS Club, NIT Srinagar

Collaboratively developed *BIS AI*, an AI-powered assistant leveraging a RAG pipeline to provide source-cited responses from BIS data, with multilingual support, voice interaction, and offline accessibility.

Coding Challenge – Tech Summit 2025

Participated in a competitive coding event focused on problem-solving, logical reasoning, and teamwork.

Code Debugging Competition – Cyber Conclave 2025

Solved debugging challenges in C, emphasizing analytical thinking and error resolution.

Treasure Hunt – Cyber Conclave 2025

Engaged in a team-based challenge requiring decision-making, time management, and critical thinking.

Coding Competition – National Technology Day 2024

Participated in a competitive coding event focused on problem-solving, debugging, and logical reasoning under time constraints.

Experience

Campus Lead — Open Source Global Connect

Dec 2025 – Present

Led and coordinated open-source awareness initiatives, organized technical sessions, and mentored students in open source contributions. Acted as a bridge between students and the global open-source community.

Student Intern — National Institute of Technology Srinagar

Dec 2025 – Feb 2026

Gaining hands-on experience in applied computer science through coding exercises, problem-solving tasks, and academic mentorship. Strengthened foundations in programming, algorithms, and teamwork.

Mentor — SWOC (Social Winter of Code)

Jan 2026 – Mar 2026

Mentoring contributors in front-end web development, guiding them through project-based learning and open-source collaboration.

Certifications & Credentials

Introduction to AI Concepts — Microsoft (Jan 2026)

Artificial Intelligence (AI), Generative AI, Responsible AI, Computer Vision

Introduction to Machine Learning Concepts — Microsoft (Jan 2026)

Machine Learning, Linear Regression, Classification, Clustering, Deep Learning

Artificial Intelligence Fundamentals — IBM SkillsBuild (Dec 2025)

Artificial Intelligence, Machine Learning, Deep Learning, AI Ethics, Computer Vision, Natural Language Processing

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — Oracle (Dec 2025)

Artificial Intelligence, Machine Learning, Deep Learning, Cloud Computing, Oracle Cloud Infrastructure

Prepare Data for ML APIs on Google Cloud — Google Cloud (Dec 2025)

Python, TensorFlow, Machine Learning, Dataflow, Cloud Natural Language API, Speech API

DSA in Modern Product Engineering — TechBairn (Dec 2025)

Algorithms, Problem Solving, Data Structures

Python for Artificial Intelligence (5-Day Workshop) — NIT Srinagar (Nov 2025)

NumPy, Pandas, Scikit-Learn

Education

B.Tech in Computer Science & Engineering, Central University of Kashmir, Ganderbal

12th (CBSE) — Medical + Mathematics, Delhi Public School, Srinagar
